LEGO Campaign Insights & Recommendations

Insights

- Overall campaign results : Total delivered 9,019, total read 4,344 (48.16% read rate), total clicks 40 with avg. CTR is 0.92%.
- The overall Click-Through Rate (CTR) across the campaign is 0.92%. This indicates that while the open rates are strong (~48%), there is a significant drop-off in engagement when it comes to clicks. The highest CTR was on October 10th at 2.29%, with 6 clicks from 568 delivered. The lowest CTR was on October 20th at 0.56%, suggesting that the content may not have appealed to the audience or that the CTA was less effective that day.
- The audience is slightly male-dominated (55% male, 45% female). Campaigns can be tailored to resonate with both genders but may focus slightly more on male interests to maximize engagement.
- The audience primarily resides and works in Jakarta Selatan (26% home, 32% work) and Jakarta Barat (23% home, 16% work), indicating a concentration of urban professionals.

Recommendations

- Refine targeting to core audience for Lego, or more specific to Lego Ninjago. Example: Lego collector, parents with kids
- More relevant message to audience target; if the program happens in Kota Kasablanka, prioritize Jabodetabek as target location. This is to avoid random targeting and ineffective marketing campaign result.

Notes:

- **Actual Delivery** : How many messages were sent.
- **Target Delivery** : Messages sent target based on FAB.
- **Clicks** : How many times landing page were clicked.
- **CTR** : Click Through Rate; number of clicks divided by the Actual Delivery.
